### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Fishman on 5/29/2007.

The application has been amended as follows: On page 8, in the third paragraph, after the first sentence ending in "host system 330.", the following sentence is added.

-- The enhanced SAS driver is stored in a computer readable storage medium. --

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: A question was raised in the previous office action on whether claim 16 was software per se and therefore not statutory. Claim 16 covers 3 embodiments of the invention. A software driver embodiment, a functional element within an SAS initiator and a functional element within an SAS expander. The functional elements of embodiments 2 and 3 are pieces of hardware and therefore a 101 rejection of software per se is not appropriate for those two embodiments. A claim drawn only to a software driver would be not statutory as being a software per se as it fails to fall within a statutory class of invention as a driver is not a machine, manufacture, process or chemical composition. Claim 16 is in means plus function format and therefore one must look to the spec to determine the meets and bounds of the claim. The above examiner's amendment to the specification limits the software driver to being stored in a computer readable storage medium.

Art Unit: 2182

Therefore all three embodiments of claim 16 recite a piece of hardware and therefore no software per se rejection is warranted. Claim 20 further limits claim 16 by stating that the driver is operating within an operating system therefore this claim is limited to the software embodiment and is statutory as the driver is stored in a storage medium while it is within the operating system. Claims 21-22 further limit the hardware functional elements to being within other hardware elements of either a SAS initiator device controller or an SAS expander.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

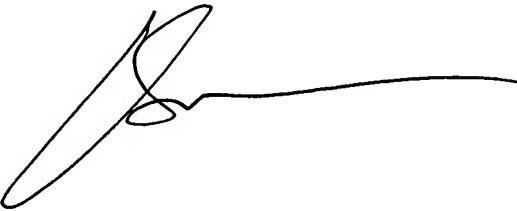

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joshua D. Schneider whose telephone number is (571) 272-4158. The examiner can normally be reached on M, T, Th, and F, 9-4:00.
